

# Geography at JCA

We want our geographers to know their place in the world with regards to human and physical factors. We want them to be able to relate and apply geographical knowledge to understand current affairs and be able to explain why they have occurred. They will also develop skills to understand and interpret information to inform and justify their opinion on global geographical issues.

	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
