

Health and social care

Subject intent:

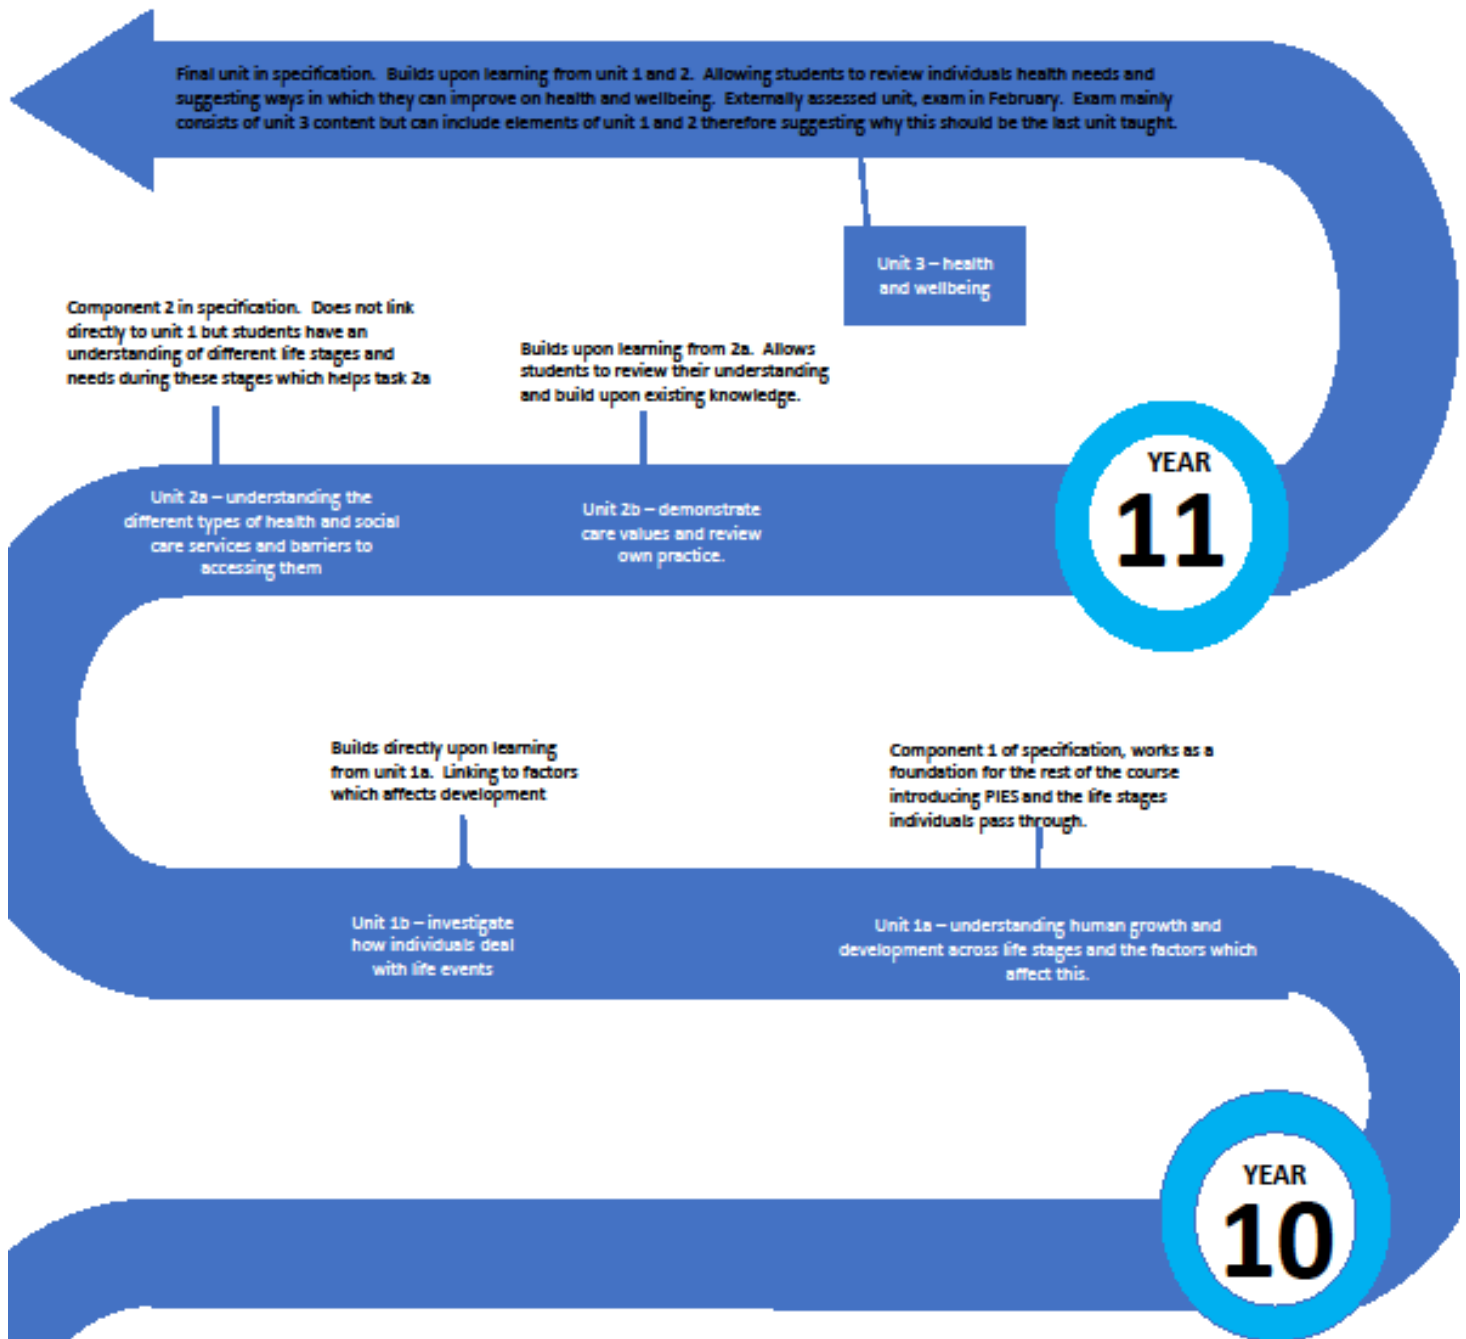

- To gain knowledge of life stages and how humans develop.
- To compare factors that affect development (e.g. wealth or relationships).
- To make connections between life events and health and wellbeing.
- To identify factors that affect physical health and discuss risks to current and future health
- To gain a deeper understanding of health and social care by exploring different viewpoints and expressing one's own opinion.
- To demonstrate and evaluate own use of the care values that underpin effective health and social care.
